Part of the Solution

COATING SOLUTIONS

**SecilTEK SP 01**  
SILICATE PAINT

# SecilTEK SP 01

**SECILTEK SP 01 IS A WATER BASED SILICATE PAINT WITH EXCELLENT WATER VAPOUR PERMEABILITY.**

## SOLUTION FOR

- Decorative finish on facades, applied to Hydraulic substrates, natural stone, sprayed stucco, plasterboard, brick, **SecilVit CORK** external thermal insulation system, **REABILITA CAL** and **Secil ecoCORK Lime** systems
- Facade decorative finish, interior walls and ceilings, applied to trowled hydraulic renders

## ADVANTAGES

- High permeability to water vapour
- Ecological paint
- Self cleaning
- Water resistant
- Resistant to the development of micro-organisms as fungi and algae
- Low consumption
- Available in 12 colours

**SecilTEK SP 01** is the ideal finishing for the following systems:

### SecilVit CORK

### REABILITA CAL

### Secil ecoCORK Lime

## TECHNICAL DATA

### Use

Interior and exterior walls

### Substrates

Hydraulic, natural stone, sprayed stucco, plasterboard, brick, **SecilVit CORK** external thermal insulation system, **REABILITA CAL** and **Secil ecoCORK Lime** systems

### Type of work

New Construction and Refurbishment

### Application

Manual by roller

### Colour

Available in 12 colors

### Theoretical consumption

8-10 m<sup>2</sup> / l / coat

### Packaging

15l Bucket  
Pallets of 33 buckets (495 l)

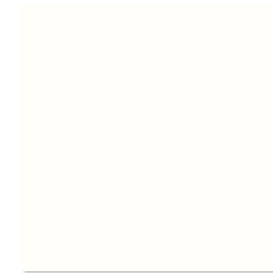

### Water vapour transmission rate (Sd)

0.01 m

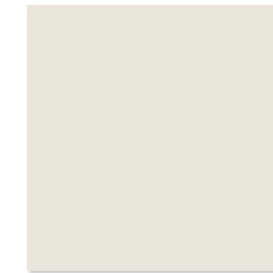

### Permeability to vapour

Class 1: <0.14 [According to ISO 7783-2]
